Garbage

By Anonymous

I expected more out of this book, considering that it is Barron's. However, this book proved to be one of the brand's rare missteps.

Many of the questions in the reading comprehension section either don't make sense or don't accurately

represent the types of questions in the real SAT. I was shocked to see that answers to some of the questions didn't even appear in the passage! I remember coming across a question which asked you to define what a certain term meant. Even with the context, it was impossible to answer it without having a background knowledge of that subject. The author clearly failed to realize that all answers to questions must appear in the passage.

Though the reading comprehension section of this book is complete garbage, the sentence completion section stands out. The questions in that section are generally harder than those found in the real SAT, but they make good practice tools to help you correctly answer those last two difficult sentence completion questions that appear in each critical reading section. To supplement this section, the book comes without a list of words that have frequently appeared in the past SATs. Most of the words were pretty basic, but they definitely did help me clearly define those words that sounded awfully familiar but which I didn't know their exact meanings.

I would not recommend buying this book solely for the sentence completion section. It's not worth the money. I would invest just a few more dollars to get the Barron's full SAT book (the 24th, 25th, or 26th edition), which are far, far better than this mediocre book. 11 of 13 people found the following review helpful.

Extremely dissapointing

By Inna Nemirovsky

I got this book expecting it to be a harder version of the regular test section, much like Barron's does for all their books. This book has passages that are either too long, or their questions are too vague. On the regular college board or even Kaplan practice tests (which are good for CR), the questions are concise (i.e in like 5-6).. Barron's does not have this. It is crap. EXCEPT...EXCEPT for the sentence completions. If you need help with sentence completions go for this, the practice is really good and realistic. 3 of 3 people found the following review helpful.

It is terribly baddddddd!

By Xiang Gao

The reading passages never helped me. Instead, it makes me frustrated because the answers sometimes can't be directly found in the passage, or they don't make sense at all. Anyway 800 vocabularies are good to know! See all 29 customer reviews...
