A FABULOUS study tool! Highly recommended

By Jackie

This is a fabulous study tool! My Hematology professor suggested this to the class at the beginning of the semester. I do not know how I would be able to perform a differential or be able to clearly identify different cells that are so close together without this tool. I would highly recommend this product to anyone who feels they need to freshen up on hematology or just someone starting to learn. This is a wonderful product I am extremely happy with the product.

Handy!

By seekerrm2233

This is a very handy reference to have. Nice size, and nice quality. There's much more to it than I thought. I'm very pleased.

Love this book

By Laura Anderson

I choose this book because it said you can write on the pages with ball point pen and wipe clean with alcohol which I tried and it works. At first I didn't realize it was a pocket sized book until it came in the mail. But also like that feature now too. The best part is that the pages are tabbed for quick and easy to find cells. I have recommended this book to other co-workers.
