Great Tool!

By T. Weiss

Dave is the expert in our industry that I send all of our customers to who have ground bearing pressure questions to. This is a great book, and the timing is excellent. With the new P30.1 guidelines set to go in to effect this year, and ground bearing pressure is a huge part of it this book is a must have! Thanks Dave!

Excellent for Construction Engineers, Structural, Civil, Geotechnical, a great Resource.

By Marvin Mooney

This is an excellent book and I recommend it for anyone in the industry who is looking for more information regarding support of mobile cranes. Specifically structural engineers, construction engineers, even field and superintendents that would like to know more regarding this subject. The information regarding crane mats is practical and a highly valued resource specifically regarding the different design approaches explained and the survey results analysis.
