Excellent Preparation
By A Customer
I read the book and passed the test on my first attempt. I did not find any errors like those found in the Oracle Press 9i exam prep books. All the topics were covered. The CD-ROM exams and flash cards were a big help. Overall, excellent test preparation.

Great Reference!

The figures and quizzes are definitely the best part of this book. It's very well written and easy to follow, however, just as with any certification, I suggest supplimenting it with a training course, or real world experience. I'm currently enrolled in an Oracle9i DBA cert course, and I'm planning on taking this test by the end of May (2002)...at that time I'll be better equipped to write a more applicable review. For now, i give it 4/5 stars, missing the 5th star because it's not the kind of text that will guarantee you an 'A' on the test...but that's probably for the best...Oracle does it right, making sure their certifications are not easily obtained by those w/o real world experience.
EDIT: took the test, got an 80% on the basic section and an 80% on the mastery section, so all in all, i must say, this book did a great job preparing me. i borrowed the equivalent from oracle press, and was dissatisifed.

Needs more work... the practice questions are way too easy.

Compared to the excellent coverage of OCA exam objectives by Sybex's Study Guide for 1Z0-007, this titles does not deliver at all. I used this guide to prepare for the exam along with the Oracle Press title and found that the latter covers the exam material in much more detail. Even the level of practice questions in the Sybex study guide are nowhere even near the level of difficulty the real exam poses. These questions should be revised keeping in view the test format (Basic/Mastery Sections). Even the coverage of materials is superficial and not enough to give the candidate the confidence to take the exam. My suggestion would be to use another book along with this study guide (I strongly recommend the Oracle Press title - the CD has some excellent questions).
