Accessible Intro To Harmony And Song Structure

By frankp93

This book, along with its companion by the same author, Songwriter's Workshop: Melody, comprise a solid, straightforward course in writing songs along the lines of what I'd (reluctantly) call "classic rock and pop" of the 60's through the 80's. The harmonic vocabulary covered in this volume is comparable to what most guitar-oriented songwriters

used then and continue to: open position chords with descending bass lines, major triads with thirds and fifths in the bass, etc. It may be a sign of the times at Berklee or, more

likely, just the author's orientation but you won't find jazz/show tune techniques here nor Steely Dan changes so if that's more your cup of joe, I'd recommend Jack Perricone's "Melody in Songwriting" which makes a great followup to this series.

But otherwise, there's little prior knowledge assumed (other than an interest in and listening experience to a wide range of songs) and much to be learned.

Kachulis's approach is to build up song structures by having you focus on individual elements: groove, chord color, modal chord progressions over small sections building to contrasts

over larger forms. Always referring to an example song or to the accompanying recording the approach is logical, and it should work for those requiring different levels of handholding and validation. You can imitate the examples closely or just

glean from the principles, going your own way.

And let's face it: Many of the points about song structure are just as applicable whether your composing German Lieder, folk ballads, cabaret torch songs or a neo-prog synth-drenched epic.

Useless without solutions to exercises

By Gary Follett

I bought the book for a course of self study. There are a lot of exercises in the book, which is great, and obviously critical to one's learning progress, but there are no solutions either in the book or anywhere on line. I attempted to use berklee's web site to ask the question about finding solutions, but it kept rejecting my question so I emailed "customer service". They told me they were too busy to answer and that I should use the web site to ask questions. Guess I won't be buying any more of their books or signing up for any of their courses.
