YOUR GUIDE TO PAEDIATRIC ANAESTHESIA. BY CRAIG SIMS, CHRIS JOHNSON BY CRAIG SIMS PDF

This Australian book on paediatric anaesthesia is practical, descriptive and exam focused. It gives safe, experience-based 'how-to' approaches to common and rarer paediatric and neonatal conditions. Assuming readers know about adult anaesthesia, it focuses on what is different about children. The key to paediatric anaesthesia is to learn the skills to be confident about managing a child's airway. Once mastered, you can then start to enjoy working with children and learning the art of managing their anxiety and that of their parents. Written by clinical, full-time paediatric anaesthetists, this is the one book that gives both all the information for specialist exam preparation, and the knowledge of contemporary paediatric anaesthesia that will stand a consultant anaesthetist in good stead.

Highly recommended book

By adrian

A well written, practical book covering all aspects of paediatric anaesthesia. It is well laid out, well illustrated, easy to read or refer to and is written in a "hands on" style. I especially like the "note" and "tip" boxes which succinctly summarise the most important points of the chapter as well as giving practical "gold"- all the stuff I wish I had known before I started anaesthetising children!! Having recently obtained my FANZCA and then completing a 6 month fellowship in paediatric anaesthesia, I have been through my fair share of paediatric anaesthesia textbooks, never really satisfied that the authors had ever really nailed the key issues, without going into unnecessary or unimportant detail. As I read this book, I found myself nodding, amazed as to how simply they had condensed crucial information into the space of 2-3 pages. I highly recommend this book if you are an anaesthetic trainee or part-time paediatric anaesthetist.

An interesting guide for non-specialist pediatric anesthesiologists

By David Faraoni, MD

This book gives clear recommendations for non-pediatric anesthesiologists who occasionally perform

pediatric anesthesia. helpful for technique learning, dosage and new ideas.
